DETAILED ACTION

Reasons for Allowance

1. Claims 1-11 are allowed.
2. **Examiner's Statement of Reasons for Allowance:**

Applicant(s) invention relates to a power-generating device, and more specifically, to a portable power generator structure.

The device has a plurality of structural elements – outer shell, the centerfolds, the transmission axis, the gear, the plurality of permanent magnets and coils installed vertically on the transition axis and driven by different means. The movement of the permanent magnets by the coils generates an electrical power, as disclosed.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the combination and arrangement of the power generating functional elements, which were interpreted by the examiner as they are disclosed and claimed, and which examiner's search failed to find.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2834
